Computer Science & Engineering Events Details

APPLICATION DEVELOPMENT

An application program is a computer program designed to perform a group of coordinated functions, tasks, or activities for the benefit of the user. The term application development is often used to refer to the activity of computer programming, which is the process of writing and maintaining the source code. In a broader sense, it includes all that is involved between the conception of the desired application to the final manifestation of that application. It may include research, new development, modification, reuse, re-engineering, maintenance, or any other activities that result in the finished application.

EVENT DETAILS :

- The event will go on for **3 Hours**.
- In this event participants will have to develop a computer application **GUI** based with the help of an API (documentation will be provided).
- The participants will have to perform a no. of operations with the application developed.

RULES & REGULATIONS :

- No languages other than **C/C++** shall be used.

JUDGING CRITERIA :

- Judging will be based on the **maximum** no. of operations performed successfully with the application.
 - All decisions by judges with respect to any aspect of the competition are final and binding on the participants. They are not subject to review.
-
